DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, drawn to a method of treating hypertension by administration of growth hormone.

Group II, claim(s) 13-19, drawn to use of growth hormone for making a medicament (i.e. interpreted as encompassing pharmaceutical compositions of growth hormone and methods of making).

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: growth hormone was known in the art at the time of the instant invention, therefore, it cannot serve as the special technical feature. The special technical feature of Group I is then the method of treating hypertension. Group II is directed to

Art Unit: 1647

use of growth hormone for making a medicament, which is a second use of the same compound of Group I. PCT Rules do not permit multiple inventions, and this is a second invention as it is a second use of the same compound. Therefore, the instant application lacks unity of invention and restriction is proper.
